Contents

Introduction	vii
Which Version of Adobe Flash?	
Other Recommended Resources	
Companion Website	
About the Authors	
1. Basics of Flash and ActionScript	13
Controlling Buttons	
Controlling a Display Object on the Stage	
Creating and Moving a Sprite	
2. Textboxes and Keyboard Events	25
Using Textboxes for a Basic Arithmetic Activity	
Understanding “Logic Flow” and User Interaction	
Listening for Keyboard Events	
Additional Resources	
3. MovieClips, Sprites, and Shapes	43
Circular Motion with MovieClips	
Circular Motion with Sprites and Shapes at Run Time	
Filling Graphics for Shaded Area	
More on the Display List and Coordinate Systems	
Additional Resources	
4. More Mouse Events	59
Getting Mouse Coordinates	
The Drag and Drop Interface	
Drawing with a Mouse	
Additional Resources	
5. Simple Animation with ActionScript	71
Animation using the ENTER_FRAME event	
Animation using the Timer class	
Animation using the Tween class	
The “Repeat Effect” for Buttons	
Additional Resources	

6. Parsing data and drawing charts	85
Creating a Simple Histogram	
Creating a Pie Chart from Data	
Creating Textboxes at Run Time	
Additional Resources	
7. A First Look at Components	103
ColorPicker, Slider and NumericStepper	
Using the Slider Component to Control Animation	
The DataGrid component: ScatterPlot revisited	
Additional Resources	
8. Components for Quizzes	115
RadioButton Component for Multiple Choice Questions	
CheckBox Component for Multiple Answer Questions	
ComboBox Component for Matching Problems	
Additional Resources	
9. Applications of Masking	127
Masking in ActionScript 3	
Regression Line Application	
Area under a Curve Application	
Additional Resources	
10. A Simple Function Grapher	139
Part 1. Drawing the Sine Function	
Part 2. Masking and Wrapping at Infinity	
Part 3. Error Checking in Range Input	
Part 4. Using the Custom MathParser Class	
Additional Resources	
11. Bread and Butter Graphing Examples	159
Tracing a Point or Tangent Line on a Curve	
Showing Area under a Curve	
Animating a Family of Functions	
Additional Resources	
12. Using the FlashandMath Custom Classes	173
Simple Computation with the MathParser Class	
A Short Answer Quiz using the MathParser Class	

The SimpleGraph Class: A First Example
Custom Appearance with the GraphingBoard Class
The drawGraph Method for a Derivative Grapher
Using the RangeParser Class for a Polar Plotter
Additional Resources

13. Working with External Content **201**

Interactive Map with Imported Graphics
Importing LaTeX Output for Mathematical Notation
Working with Flash Video
Simple Slide Show: Importing Content at Run Time
Adding Simple Sounds
Loading Multiple Images
Additional Resources

14. Using XML in ActionScript **219**

Using XML to Customize an Applet
Using XML for an Example Gallery
An XML-Based Scrolling Banner
An XML-based Quiz in Flash
Additional Resources

15. Working with MovieClips **241**

The Cereal Box Problem
Using the Timeline of a MovieClip (Tiny Bubbles)
Loading SWF Files at Run Time (More Bubbles)
Creating a Master Quiz Structure
Additional Resources

16. Simple 3D Drawing for Flash Player 10 **261**

Flipping a Card in Flash CS4
Matrix3D and Rotating a Cube in Space
Adding Imported Graphics: Rotating Picture Cube
Rolling the Die
Redrawing at RunTime: An Icosahedron
Additional Resources

17. Bridging the Gap **291**

The Bubble Class with Code on the Main Timeline

The Bubble Effect as a Custom AS3 Class
A Bubble Tools Package
Card-Flipping Classes for CS3 and CS4
A Classic Memory Game with Cards
A Mathematical Memory Game
Additional resources
